[Chapter 10 : Add Code & Code Block](#)

[Chapter 11 : Tables](#)

1. Headings

To create a heading, add number signs (#) in front of a word or phrase. The number of number signs you use should correspond to the heading level.

For example, to create a heading , number signs (e.g., # My Header).

Heading h1

Heading h2

Heading h3

Heading h4

2. Special Text Formatting

To create paragraphs, use a blank line to separate one or more lines of text.

To create a blockquote, add a > in front of a paragraph.

```
> This is special text of markdown
```

Blockquotes can be nested. Add a >> in front of the paragraph you want to nest.

```
>> Heading 1
```

```
>>> Heading 2
```

3. Line breaks

This is first line of course of markdown full tutorial in 72 minutes at codanics. website with instructor baba ammaar

This is second line

4. Combine heading and words

Heading h2

5. Face of Text

To create bold text, surround the text with double asterisks (e.g., **bold text**)

bold

italic

bold and italic

you can use bold and italic with underscore

bold

italic

Write in Comments for bold and italic

bold and italic

6. Bullet Points / List

To create an unordered list, add dashes (-), asterisks (*), or plus signs (+) in front of line items. Indent one or more items to create a nested list.

- Day 1
- Day 2
- Day 3
- Day 4
- Day 5
 - Day 5.1
 - Day 5.2
 - Subheading of subheading
- Day 6
 - Day 6.1
 - Day 6.2

Numbering of List

1. Day - 1

2. Day - 2

3. Day - 3

7. LINE BREAKS

To create a horizontal rule, use three or more asterisks (*******), dashes (**---**), or underscores (**___**) on a line by themselves.

8. Links and Hyperlink

To create a link, enclose the link text in brackets (e.g., [**Duck Duck Go**]) and then follow it immediately with the URL in parentheses (e.g., (<https://duckduckgo.com>)).

[Codanics Full Markdown Course](#)

This is the hyperlink :

To quickly turn a URL or email address into a link, enclose it in angle brackets.

Full Course of Markdown at Codanics is [here](#)

9. Images and Figures with link

Use square bracket for label and round bracket for link of image

 This is beautiful image of ocean logo

Comments in Markdown and Shortcut

This is comment shortcut **ctrl+/ *like html***

10. Add Code and Code Block

To denote a word or phrase as code, enclose it in backticks (`).

```
print("This is a string")
```

```
print("This is string method of python ")
```

Use 3 tick to add code block

This Code will show code block with python syntax to sum two numbers

```
x = 10
y= 12
z = x+y
print(z)
```

11. Add Tables :

Name	Roll No.	Department
Faheem	12	Web Developer
Mahmood	19	UI / UX
Tahseen	13	Graphic Designer
Fareed	10	Data Engineer
Abdul Aziz	9	Youtuber

13. Install Extensions
